

The background of the entire image is a light-colored surface with a faint, repeating pattern of hexagons. Scattered across this surface are several stacks of silver coins of varying heights. In the upper left corner, a person's hand is visible, holding a single coin between their thumb and index finger. The overall aesthetic is clean and professional, suggesting a financial or investment theme.

INVASSET PMS

**INV
ASSET**

Fund Characteristics

Fund Type	SEBI Registered PMS: INP000006907
Minimum Investment	50 Lacs (as per SEBI Regulations)
Fund Type	Open Ended
Benchmark	S&P BSE 500 TRI
Structure	Discretionary PMS
Portfolio manager	Anirudh Garg

Disclaimer: As on 31st January 2026 | Inception Date- INVasset Growth Fund: 08 January 2020
Past Performance is not indicative of or a guarantee of future returns or risk.

Fund Manager's Investment Beliefs

Protection

Preserving capital strengthens confidence through discipline. Our primary responsibility remains prudent portfolio stewardship. We seek to manage risk thoughtfully and help clients navigate market fluctuations with patience, diversification, process, and long-term perspective.

Innovation

Most fund managers I met were stuck in the past – relying on gut and habit.

We chose to evolve – using the power of tech & data to break boundaries and try to spot Multi Baggers in nascent stages.

Alpha

Growth is the essence of investing .

We aim to outperform the benchmark (S&P BSE 500 TRI Index) by 1.5 to 2x over a 3 Year Horizon

Objectivity

The biggest failure I saw? Bias. Sector bias. Style bias. Ego bias. Recency bias.

That's why INVasset is system-driven – built to adapt, not assume.

“Our investment philosophy is built on discipline, objectivity & continuous learning – Guiding every decision we make at INVasset”

- Anirudh Garg

INVasset's AAID Strategy

Disclaimer: The strategies and phases outlined here represent internal investment frameworks, not guarantees. Actual allocation and outcomes may vary based on market conditions. All investments are subject to market risks, including potential capital loss.

Value Stage

“What may seem like value in rising markets is often a value trap. We focus on value only when overall market valuations are attractive”

Corrections are a natural part of equity markets. Factors such as late entries, concentrated portfolios, and weak conviction can amplify volatility and investor behavior during periods of uncertainty.

Growing economies with large demographic bases typically experience two forms of market corrections:

The Bull Market corrections: Periodic pullbacks during rising markets. We focus on established businesses where earnings visibility and business fundamentals remain resilient through market volatility.

The Bear Markets corrections: Deeper and broader market dislocations. We seek opportunities in fundamentally strong businesses positioned for recovery as market conditions normalize.

With INVasset AAID™, we embrace market corrections to :

- Strengthen portfolio positioning at attractive valuations
- Improve long-term portfolio efficiency through disciplined rebalancing

Growth Stage

“Every bull market reveals new leaders. We seek to identify them through tailwinds and structural shifts.”

How we do it?

- Identify Relative Change in management, policy, macro factors, and cycles.
- Apply the AAID RC² framework across a broad universe of companies to assess leadership potential.
- Build a focused research universe for in-depth fundamental analysis
- Conduct detailed research before portfolio inclusion

We follow conviction with discipline & patience.

1

Management or capital shifts creating leadership opportunities (e.g., strategic acquisitions, business restructuring)

2

Policy or geopolitical changes (e.g., regulatory shifts, trade realignments)

3

Structural shifts post major events (pandemics, geopolitical disruptions)

4

Interest-rate cycles impacting sector leadership

5

Leadership transitions across sectors

6

Sector cycles, inventory trends, and competitive shifts shaping industry leaderships

Disclaimer: The stages and strategies outlined here are based on our current approach and research framework. While they serve as guidance for managing portfolios, there is no assurance they will be followed exactly in every situation. Market conditions and fund manager discretion may lead to adaptations, modifications, or deviations from the described process. This is not investment advice, nor does it guarantee protection of capital or specific returns. All investments are subject to market risks.

Quality Stage

Prudent Management

High ROCE, disciplined capital allocation, shareholder-friendly policies, clean related party transactions, trustworthy promoters

Market Leadership

Those dominating niches – Reliance (OTC), Nestle (baby cereal), Asian Paints (paints), ITC (cigarettes), Pidilite (adhesives).

Moats

Lasting advantages – strong brands (Coca Cola, Nestle), network effects (Amazon, IndiaMart), cost leadership (Walmart, D-Mart)

Disruptors

First movers shaping new industries – Bajaj Finance (retail loans), Zerodha (free broking), Zomato (food delivery)

“Expensive Markets often stay expensive for long stretches. During such times, it pays to hold quality — resilient, trusted businesses you’re comfortable holding even in bear markets.”

Safety Stage

“ No model can predict market extremes with certainty. We use data and discipline to identify periods of elevated risk. During such phases, our focus remains on prudent portfolio positioning and capital stewardship.”

In Expensive & Exuberant Markets, shift focus on Capital Preservation

How we do it:

Beta Reduction: Shift to low-beta stocks.

Non-Correlated Assets: Allocate to safer options like gold, bonds, arbitrage funds, and special situations.

Hedging: Use index futures and options to limit downside risk.

Goal: Reduce portfolio risk during elevated market stress while retaining flexibility to redeploy capital as market conditions evolve

Disclaimer: The stages and strategies outlined here are based on our current approach and research framework. While they serve as guidance for managing portfolios, there is no assurance they will be followed exactly in every situation. Market conditions and fund manager discretion may lead to adaptations, modifications, or deviations from the described process. This is not investment advice, nor does it guarantee protection of capital or specific returns. All investments are subject to market risks.

Risk Management Framework

“The pain of losing money often outweighs the joy of gains. Capital discipline lies at the heart of long-term investing — once confidence is lost, rebuilding it takes time. Anirudh Garg

Market Risk

- Broad allocation across a diversified set of companies with calibrated position sizing
- Sector and thematic exposure monitored within internal risk guidelines
- Adjust portfolio sensitivity across market phases

Credit Risk

- Deep research with sector experts.
- Stress-test leveraged firms.
- Continuous financial monitoring.

Behavioral Risk

- Strict quant model with delegated roles.
- No override by fund manager.
- Changes require process update and board approval.

Operational Risk

- Fund accounting/custody with SEBI-registered Nuvama.
- Strong compliance team.
- SEBI-compliant audits and clear policy framework

Liquidity Risk

- Stress-test liquidity
- Monitor exposure to relatively illiquid securities within internal limits
- No unlisted/SME stocks.

Model/ Process Risk

- Continuous updates, daily market learning.
- Back-test rigorously
- Test on prop capital before clients

Disclaimer: The risk management principles and practices outlined here are based on our current framework and philosophy. While they serve as guidance, there is no assurance they will be applied exactly as described in every situation. Portfolio decisions and risk controls are subject to market conditions, regulatory norms, and the discretion of the fund manager. This does not constitute investment advice or a promise of capital protection or returns. All investments involve risk, including the potential loss of capital

AAID Stage Shift Since Inception

Disclaimer: For Information purpose only. Stage shifts in our AAID framework are gradual and typically occur over 20-40 days. The stages shown here represent approximate timeframes and are aligned with key directional changes rather than exact dates. Similarly, the Month-End NAVs are provided for indicative reference and may not fully coincide with the exact start or end of a given investment stage. Performance attribution to each stage is therefore approximate, not absolute

STT, stamp duty, NSDL, SEBI, audit, custody) are indicative and subject to change by respective authorities. INVasset PMS does not earn or benefit in any form from these charges. Please refer to your individual agreement for applicable terms. All investments are subject to market risks, including potential capital loss.

DISCLAIMER

Disclaimer – INVasset LLP (SEBI Reg. No. INP000006907)

Performance Disclosure: All performance metrics (including CAGR, drawdowns, and any alpha over benchmarks) shown in this presentation are based on historical data. Past performance is not indicative of future results, and future returns may vary significantly. Any returns or targets mentioned are internal, illustrative goals and are not guaranteed.

Risk Factors: Investments under the Portfolio Management Service are subject to various market risks, including but not limited to equity market volatility, interest rate fluctuations, political and economic instability, and business or sector-specific risks. Investment in securities can result in loss of capital, and there is no guarantee of returns. Investors should be aware that they might receive back less than what they invested.

Strategy & Allocation Changes: The described investment strategy (including sector allocations, the AAID framework, and stated investment parameters or beliefs) is indicative and subject to change. There is no assurance that the portfolio will adhere to the stated strategy, allocations, or framework at all times. The Portfolio Manager may adjust the strategy or allocations at its discretion in response to market conditions, and no assurance is given that the strategy will achieve its objectives or targets.

Fee Structure and Costs: All fees and charges – including management fees, performance (incentive) fees, entry or exit loads, and other costs – will be applied as per each client's individual agreement and may vary from client to client. Actual outcomes for investors will differ based on their specific fee structure and the timing of their investments and withdrawals. Different clients may experience different net performance results even within the same strategy, owing to differences in fee arrangements and entry/exit timing.

Third-Party Investment Risk: The portfolio may include investments in third-party managed instruments such as mutual funds, liquid or arbitrage funds, bonds, or other securities managed by external parties. These underlying investments carry their own risks (e.g. market risk, credit risk, liquidity risk) which are independent of the risks of the INVasset portfolio. The Portfolio Manager has no control over the performance or management of third-party funds or securities and does not guarantee the performance of any third-party investment.

Data Sources and Past Performance References:

The data, figures, and statements in this presentation have been obtained from sources believed to be reliable, including public platforms such as BSE and SEBI, as well as internal research. While efforts are made to ensure accuracy, no warranty of completeness or accuracy is given. Data points and calculations (including benchmark information) may be updated or revised without notice. Any past performance or market information is provided for illustrative purposes; individual portfolio performance may vary, and no two investors are guaranteed the same results.

No SEBI Certification:

This presentation and its contents have not been reviewed or approved by SEBI. SEBI has not certified the accuracy or adequacy of the information herein. INVasset LLP's registration with SEBI (Reg. No. INP000006907) does not imply any endorsement or official validation of our investment approach or performance claims.

Advisory & Due Diligence:

Prospective investors are strongly advised to conduct their own due diligence and consult their financial, legal, and tax advisors before making any investment decisions. This presentation is not intended to substitute for personalized investment or professional advice. Investors should carefully read and understand all relevant documents (including the PMS Disclosure Document and other offering materials) and consider all risk factors before investing.

Informational Use Only (No Solicitation):

This material is provided for informational purposes only and is intended solely for the recipient's personal use. It does not constitute an offer, invitation, or solicitation to buy or sell any securities or to invest in any Portfolio Management Service. Nothing herein should be construed as investment advice or a recommendation. No part of this presentation may be copied, shared, or distributed to any third party without the prior written consent of INVasset LLP.
